

TRAPS MANAGED DETECTION and RESPONSE SOLUTIONS

Continuous management and monitoring through CRITICALSTART's Managed Detection and Response Services for Palo Alto Networks Traps™ advanced endpoint protection.

99% REDUCTION IN ALERTS

TRAPS ADVANCED ENDPOINT PROTECTION SERVICES

- 1** Stops malware, exploits and ransomware before they can compromise endpoints.
- 2** Provides protection while endpoints are online and offline, on network and off.
- 3** Coordinates enforcement with network and cloud security to prevent successful attacks.
- 4** Includes WildFire® cloud-based threat analysis service with your Traps subscription.
- 5** Integrates with the Palo Alto Networks® Security Operating Platform.

KEY BENEFITS OF TRAPS AND CRITICALSTART'S MANAGED DETECTION AND RESPONSE

- Traps deploys with security profiles already set up on **day 1**.
- Protections against script-based attacks and processes are **automatically pushed** from Unit 42 threat research.
- **99% reduction** in alerts.

CRITICALSTART's SERVICE SNAPSHOT

Accelerate your production MDR deployment to weeks instead of months.

Our certified consultants are experts in logging solutions, cloud infrastructure and event collection.

MOBILESOC app gives you industry leading detection and response capabilities on the go.

24x7x365 access to experienced analysts and incident responders.

100% transparency; you see what we see.

ADVANCED INSIGHTS AND PREPARATION WITH CRITICALSTART

Using our own battle-tested assessment and implementation process, we can assist you with deployments of all sizes.

TRAPS CONTENT DEVELOPMENT

CRITICALSTART can assist you with use case and security content development. Your team can develop custom detections on their own or with the support of the CRITICALSTART team.
