Certificate Manager	Sectigo	Manage public & private certificates from a single platform. The Sectigo Certificate Manager is a complete management platform enabling you to easily manage PKI certificates at scale. It makes life easier for security administrators by automating the issuance, discovery, renewal, revocation, and replacement of certificates numbering in the thousands, tens of thousands, or more. What's more, the Sectigo Certificate Manager supports any trust model you require and can be used to manage certificates issued through Sectigo's public CA and from your own private PKI. It is interoperable with all leading devices, operating systems, protocols, and chipsets, and provides visibility and management through a single pane of glass, enabling you to administer PKI across all websites and devices in your infrastructure, both in the cloud and behind your firewall.
