MOBILE**SOC**™

Access Managed Detection and Response (MDR) on-the-go to shrink attacker dwell time.
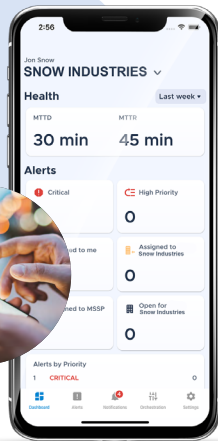

Go beyond ticketing.
Save time and reduce stress with a unified view of alerts, tickets, reports, and investigation details.

Go beyond instant notifications.
Protect your most valuable asset—your data, by taking immediate action based on information from our MDR platform.

Go beyond your desk.
Experience the freedom and flexibility of working directly with CRITICALSTART senior security analysts, regardless of your location.

Instant notifications mean you never miss an event, and the health dashboard provides a quick look into your environment on-the-go.

See full alert data, including the timeline of all actions taken and collaborate directly with CRITICAL**START** Security Analysts from anywhere, anytime.

Investigate alert details, assign and escalate alerts, isolate hosts, and mitigate threats directly from within the application.
