CRITICAL**START**®
Managed Threat Intelligence (MTI)

Elevate your cyber resilience with advanced threat intelligence solutions.

KEY BENEFITS

✓ Enriches defenses through deep cyber landscape monitoring translating emerging threats into security guidance to stay ahead of risks

✓ Accelerates response to compromised accounts, leaked credentials, vulnerabilities exposures, and other dark web threats to prevent exploitation

✓ Provides comprehensive digital asset surveillance assessing threats in covert spaces like hacking forums and messenger channels

✓ Delivers fully customized intelligence, spanning foundational monitoring to elite investigation research and analysis based on needs

✓ Equips security leaders with strategic recommendations and timely advisories to proactively navigate threats

Premium Intelligence

- **In-Depth Cyber Insights**: Continuous monitoring and analysis provide a deep understanding of the cyber threat landscape, helping you stay one step ahead of potential risks.
- **Collaborative Research**: Engage with our experts to interpret intelligence findings and adapt your security posture proactively.

Dark Web Monitoring

- **Compromised Accounts Detection**: Rapid identification of unauthorized account activities to initiate immediate remediation.
- **Leaked Credentials Alert**: Notifications and responses to incidents involving exposed user credentials to prevent further exploitation.
- **Instant Messaging Surveillance**: Insight into covert communications among threat actors, capturing early signals of planning and coordination of attacks.
- **Hacking Discussions Tracking**: Close monitoring of illicit online spaces for mentions of your organization, enabling swift action to mitigate emerging threats.
- **Network Vulnerability Intelligence**: Regular scanning and analysis to identify and address potential weak points in your infrastructure.
- **Data-Loss Detection**: Implementing robust mechanisms to detect and prevent data breaches, preserving the integrity of sensitive information.
- **Asset Monitoring**: Comprehensive surveillance of your digital assets to ensure security and compliance with industry standards.

Request for Intelligence (RFI)

- **All-Source RFI**: Leverage our extensive intelligence network for deep-dive analyses and comprehensive threat reports.
- **Malware RFI**: Detailed breakdowns of malware behavior, propagation, and counter measures, tailored to your specific threat profile.

Why Choose Managed Threat Intelligence (MTI)?

The proliferation of sophisticated threats and increasing attack surfaces makes it difficult to protect critical data. Our MTI service helps customers proactively address this evolving threat landscape by amplifying their ability to effectively manage risk and mitigate threats with in-depth, actionable insights and expert guidance. This includes:

- **Customizable Intelligence**: Tailor your threat intelligence service level based on your organization's needs and maturity.
- **Strategic Cyber Management**: Receive guidance and recommendations to effectively navigate the cyber threat environment.
- **Proactive Defense Posture**: Access the latest research and developments to strengthen your security measures ahead of potential threats.
