

PENETRATION TESTING

TESTING THE EFFECTIVENESS OF YOUR SECURITY ENVIRONMENT.

Whether you've built and deployed state-of-the-art security technology or just starting to assess your security needs, CRITICALSTART's TEAMARES penetration testing team can help. We'll evaluate your security posture and determine how exposed your systems, services and data are to malicious threat actors.

Our penetration testing research team leverages manual methods with a vast array of toolsets we've developed in-house to provide you with comprehensive and cost-effective testing. We work hand-in-hand with our award-winning Managed Detection and Response (MDR) team to keep apprised of the latest exploits or attempts that are occurring in the marketplace.
