CRITICALSTART

Microsoft

MDR powered by Microsoft Threat Protection and Azure Sentinel. Integrated managed Endpoint and SIEM solutions to detect and resolve every alert.

Operationalize and gain the full power of your endpoint and SIEM tools powered by Microsoft with CRITCIAL**START'**s Managed Detection and Response (MDR).

Microsoft Defender ATP   Azure Sentinel

Securing Your Environment

The power of Microsoft Defender ATP:

A unified endpoint platform for preventative protection, post-breach detection, automated investigation and response.

The power of Azure Sentinel:

A scalable, cloud-native, SIEM and SOAR solution that delivers intelligent security analytics and threat intelligence across the enterprise from on-premises and cloud signals, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Combined Together:

Provides seamless integration across services and attack vectors to stop advanced threats and quickly detect anomalous behavior. Integrated detection across Endpoints, Identities and Office 365 helps to reduce false positives by contextually aggregating alerts together to identify attacks and create unique insights from trillions of signals.

The power of full mobility with complete transparency:

Our MOBILE**SOC** gives your analysts secure remote collaboration, 100% transparency, and multiple endpoint remediation for greater efficiency. The CRITICAL**START** MOBILE**SOC** empowers your team with instant security alert triage and anywhere/anytime communication.

CRITICAL**START**

End Alert Overload With CRITICAL**START** MDR

CRITICAL**START**'s MDR is a purpose-built alert resolution platform that gives complete transparency, improved efficiency, and tighter security.

Ingesting data into CRITICAL**START**'s Trusted Behavior Registry (TBR) enables us to put our trust-oriented approach into action by automatically resolving what is known-good and can be safely trusted first – shifting focus to known alerts for triage and quick resolution. This is what it means to effectively stop accepting risk.

CRITICAL**START**'s TBR is unique to each organization. It scales and adapts to the processes and requirements of business. This reduces attacker dwell time and stops breaches before they happen.

The Key Benefits of the Integration

- **Resolve 99%** of known good events with full investigation and response of every security alert and incident.
- **Trust-oriented** approach with the CRITICALSTART TBR for fast alert triage and resolution.
- **100% Transparency** with full visibility into every data point collected and every alert resolved or escalated.
- **Seamless integration** across services and attack vectors to stop advanced threats and to quickly detect anomalous behavior.
- **Reduce false positives** with contextual aggregation of alerts to identify real attacks.
- **Scalable**, cloud-native, SIEM and SOAR solution delivering intelligent security analytics and threat intelligence across the enterprise.
- **Single solution** for alert detection, threat visibility, proactive hunting, and threat response.
- **Accelerate** your production MDR deployment to weeks instead of months.

CRITICALSTART Managed SIEM Powered by Azure Sentinel

- Collect on-premise and cloud data across all users, devices, applications, and infrastructures.
- Reduce infrastructure costs by up to 60% - only pay for what you use.
- Deepen your insights about data from your third-party sources and Microsoft products, including Office 365.
- Eliminate false positives to optimize workflows.
- Simplify SOC and speed threat detection with AI.

CRITICALSTART Managed Endpoint Powered by Mircosoft Defender Advanced Threat Protection

- Endpoint protection with Microsoft Defender ATP, enabling preventative protection, post-breach detection, automated investigation, and response.
- Protect against malicious threats from emails, links, attachments, and collaboration tools.
- Use Active Directory signals to eliminate cybersecurity threats and attacks.
- SaaS solution giving visibility, data control, and protection to Microsoft Cloud Apps.

Stop Accepting Risk. Resolve Every Alert.
Stop Breaches with CRITICAL**START** MDR.
